

Payeer for CMS Wordpress 4.7.2 – Easy Digital Downloads 2.7.4

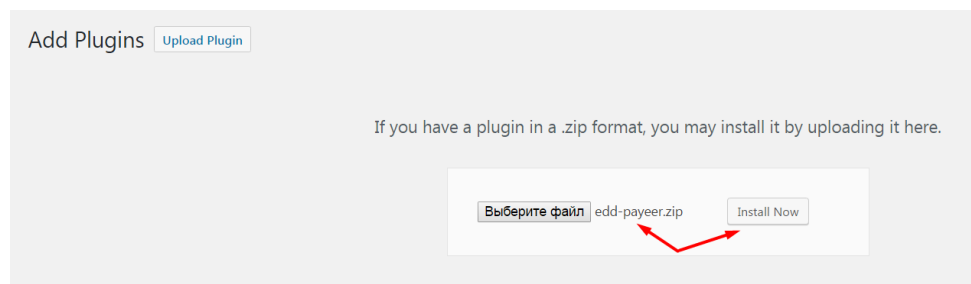

In admin panel go to “Plugins -> Add new”.

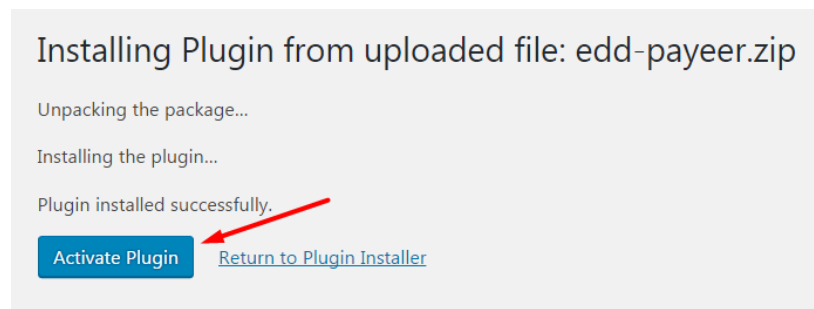

Click “Upload Plugin”.

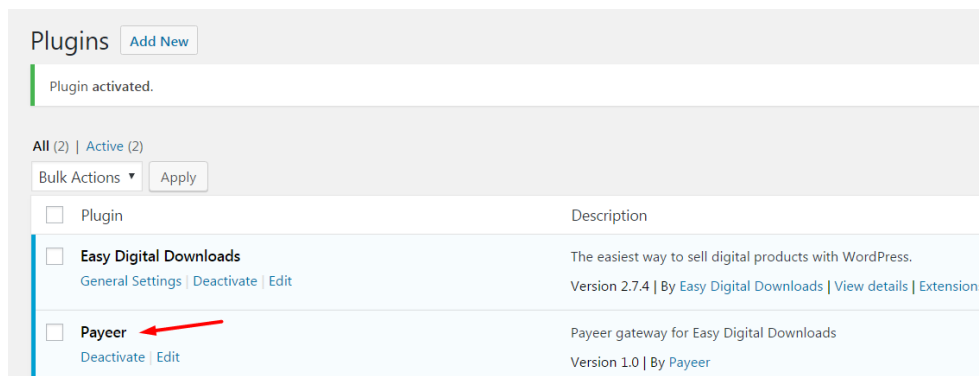

Select the archive edd-payeer.zip and click “Install Now”.

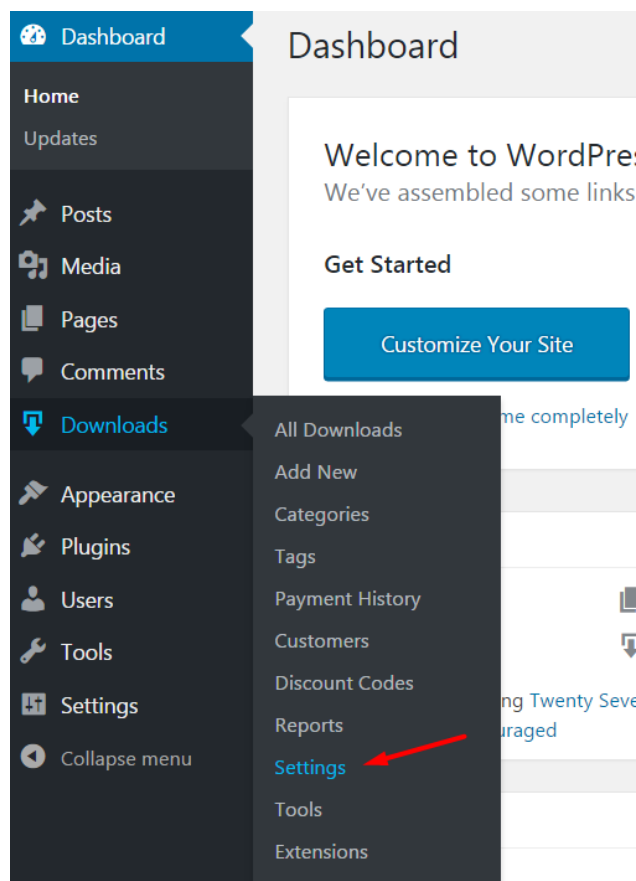

After successful installation, activate the plugin.

In the list of installed plugins, you should see the newly installed module Payeer.

Open the settings of the plugin Easy Digital Downloads by going to "Downloads -> Settings".

Open the tab "Payment Gateways" and activate Payeer, specify the default gateway Payeer.

☐ Mastercard ☐ Visa ☐ American Express

Display icons for the selected payment methods
You will also need to configure your gateway settings

Below are the payment gateways specify the settings of the payment system Payeer.

Payeer settings

Merchant URL

ID store

Secret key

IP filter incoming requests

Email for errors

Path to the transaction log

[Save Changes](#)

Merchant URL: the default path to the payment <https://payeer.com/merchant/>

ID store: id of your store in the system Payeer.com (can be found in the personal cabinet).

Secret key: the secret key of your store, also issued to you when registering in the system.

Path to the transaction log: if you specify the path to the file logging, you will be recording information about payments via Payeer.

IP filter: You can specify the list of all trusted ip addresses of servers, separated by commas. You can also specify a mask instead of the ip address. If the field is empty, checking for trusted ip addresses is not performed.

For example:

192.168.71.87, 192.165.83.17, 192.178.34.15

Or 192.*.71.87, 192.165.83.*, 192.*.34.15

Or *.*.*.* - all available ip addresses

Email for errors: enter your email address to receive notices in the event of an error of payment. The letter will state the reason and basic information about the payment.

Click "Save Changes".

On the website payeer.com in the dashboard, enter the URL in the store settings.

Secret key:	Who pays commission:
<input type="text" value="*****"/>	<input type="text" value="Client/Merchant"/>
Key for encryption additional parameters:	
<input type="text" value="*****"/>	
Domain:	
<input type="text" value="payeer.com"/>
